# Instructions for installing ePass 2003 keys of the Internet Banking system

Type in the address line (Google Chrome, Mozilla Firefox) the address <u>www.aab.uz</u> and click on the Internet Banking tab (Figure 1).

## Go to the section "Corporate Internet Banking" (Figure 2)

# (Figure 2)

Download the following drivers and components

- ePass2003
- StyxCNG 1.0.0.17.exe.
- StyxClient install -2.7.5.exe

Then extract from the archive and install as Administrator in the following order: Epass2003, StyxCNG - 1.0.0.17.exe , StyxClient - install - 2.7.5.exe

After installing all the components, you need to go to the specified path:

## My Computer/Local Disk C:\Program Files/StyxClient

and run the file **StyxTokenManager**, insert the key into the USB port and enter the password for the key in thewindow. (PIN)

Next, run the **StyxWizardActiveX** file in the same folder. In the Wizard Welcome window (Figure 5), click "*Next*", then:

• Check the "Use silent mode" box,

• In the search line remove (erase) the default word "CRBU" (or other data) and instead press the space bar, then press the button with a multi-point (Figure 6) to search for your certificate.

A certificate with the name of your organization or director's name will appear in a separate window, which should be selected by pressing the **Ok** button (Figure 7).

• Then everything is as shown in Figures 8, 9 and 10
